MERN Stack | May 2021 – June 2022

- Covered the track of DSA specialization, solved 130+ questions on GFG, 170+ on Leetcode, 390+ questions solved on AccioJob portal.
- Array, String, LinkedList, HashMap, Tree, Graph.
- Searching & Sorting algorithms
- JavaScript, HTML, CSS, Reactjs, Redux, Nodejs, MongoDB.

## EDUCATION

### Bachelor of Chemical Engineering

MITAOE Pune | Aug 2013 | Distinction

## PROFESSIONAL EXPOSURE

### MERN Stack Developer Karands Business Services | 1 month

- Here, we were developing a third-party background verification application using React js + Node js + Express + MySQL.
- I created schemas according to the app requirements, wrote REST APIs for the same, consumed those APIs on the client side.
- Also, wrote logic for the UIs like Validations, Forms and implemented a survey page.

### Frontend Developer Infinity Spark Pvt. Ltd. | 2 months

- Created a fully responsive website for our company using React js bootstrap, media queries, material UIs etc.

## PROJECTS

### Library Management App

June 2023

- An application that manages a book entries with their title, author(s), category & price for multiple users.
- User registration with email-id followed by account creation. Perform new book entries and edit/delete existing entries.
- Implemented 2 Factor Authentication via JWT, session base authentication, REST APIs, Express server, Rate limiting, Pagination, Validation& password encryption.
- Future Additions: Forget Password & Resend Email verification link.
- Tech Stack: EJS + Nodejs + Express + MongoDB

### Typing Speed Test App

May 2023

- An app that allows user to correctly test his word typing speed.
- To save records user has to register & create account.
- After login user can start the test by simply typing. Correctness of spelling is indicated by font-color red/green.
- A User can select a theme. Graphical representation of user's performance.
- Tech Stacks: Reactjs + Firebase + Fire store

## PROFESSIONAL EXPERIENCE
